(54) TRANSFER PROCESSING METHOD, TRANSFER PROCESSING SYSTEM, AND COMPUTER PROGRAM FOR TRANSFER PROCESSING

(57) Abstract:

**PROBLEM TO BE SOLVED:** To provide a transfer processing method, a transfer processing system, and a transfer processing computer program, which surely identify a payer by transfer, preventing forgetting of transfer by the payer, substantially widening the utilization of a drawing function from an account, simplifying payment in internet shopping, ensuring security, and lightening a load of transfer processing to a payer.

**SOLUTION:** This transfer processing method is one where first a payee conducts the transfer procedure and a payer accepts it, then the transfer is conducted in a banking facilities system, such as a bank system. The payee conducts the transfer procedure and the payer accepts the transfer procedure, and thereby, the transfer processing is conducted.
